MIGHTYRODS PRO

NEXT GEN ADVANCED TECHNOLOGY

MightyRods PRO cable rods encompass a fusion of advanced technological features that deliver the ultimate in cable rod performance.

Improving on the job efficiency, MightyRods PRO cable rods get the job done.

100% SPLINTER PROOF RODS

SplinterSHIELD is an advancement in cable rod technology. The durable SplinterSHIELD coating fully encases the inner fibreglass rod to prevent harmful splintering

UNSURPASSED STRENGTH

Through the use of an innovative triple fixing system, the super tough zinc-plated steel Mighty-Fix connectors offer unsurpassed tensile strength in excess of 275kg. Furthermore, the ultra-slim profile reduces snagging and provides accessibility through smaller holes.

Pom Draw Tape 30m

High quality draw tape constructed of three intertwining POM (Polyoxymethylene) strands. Helical tape structure for reduced friction and high tensile strength. Flexible head attachment for navigating conduit with multiple bends. Robust plastic casing for convenience during storage and transportation.

Item Number			
495056	30m (98ft)	6mm	1

DRAW TAPES

Steel Wire Draw Tape (POM Coated) 50m

Superior quality draw tape. Constructed from steel core wire and durable POM (Polyoxymethylene) coating. Steel core wire provides optimum rigidity and exceptional tensile strength for effective pushing and pulling of cable through runs of conduit. Abrasion resistant and low friction; the POM coating has material properties that are well suited to cable pulling applications. Fitted with a flexible head and draw eye for minimal resistance whilst navigating cable through conduit with multiple bends.

Item Number			
495055	50m (164ft)	5.5mm	1

Nylon Draw Tape

Nylon Draw Tape for low friction and high strength during cable pulling applications. Flexible head attachment for navigating conduit with multiple bends. Red coloured tape for improved visibility in conduit with existing cables. Robust plastic casing for convenience during tape rewind, storage and transportation. Non-conductive properties for safe working practices.

ESD & PRECISION

ESD & PRECISION TOOLS

WHAT IS ESD?

ESD stands for Electro Static Discharge.

The C.K ESD & Precision range is designed specifically for electronics professionals and technicians that require products of the highest quality for ultra fine work.

Electrostatic energy can build up rapidly on a person or object. If two electrically charged objects are brought into contact with each other, a spark may jump from one object to the other in a fast electrostatic discharge.

This rapid discharge of electrostatic energy can cause damage to electronic components, particularly during the assembly and maintenance of electronic equipment.

C.K ESD tools ensure that electrostatic energy is released in a controlled manner thereby preventing sparks from developing.

PRECISION BOX JOINT

MIRROR POLISHED SURFACE

SPOT WELDED DOUBLE LEAF SPRINGS

The C.K ESD range is fully compliant with IEC 61340-5-1 ensuring safe use on sensitive equipment.

CUTTING EDGES

The geometry of the cutting blade determines both the performance and lifetime of the product. A sharper cutting edge reduces 'cutting shock', the energy transmitted to the wire during the cutting process that can cause damage to sensitive components. There is a trade-off however, the sharper the cutting edges, the quicker the blade will wear. The cutting capacity will also be reduced.

SAFETY & SECURITY

Kasp security products are designed and manufactured to the highest standards, precision engineered for exceptional strength and reliability and are renowned for being locks you can trust.

Safety is paramount and the selection of quality tools and equipment is vital. Kasp offers the total package for Electrical Safety & Equipment Security from the one trusted brand.

LOCKOUT FROM KASP

Introducing our concise Lockout range, all items are strikingly packaged for easy identification, choice and purchase. MCB Lockout, our unique Essential Lockout Kit, hasps and specific padlocks, all manufactured to strict standards and offered at very competitive prices.

WHAT IS LOCKOUT/TAGOUT?

Lockout/Tagout is an essential safety procedure to ensure that an energy supply is 'locked off' while maintenance is being carried out. Every year there are thousands of work accidents which occur while repairing or servicing machinery, most of which are due to energy sources that have not been isolated. There is much legislation covering this issue including The Electricity at Work Regulations of 1989, UK the Provision of Work Equipment Regulations – Regulation 19 and EU Guidelines 89/655, the result is that every company has a legal requirement to safeguard workers from a sudden release of energy.

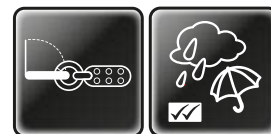

Simply, the procedure is to physically 'lockout' a source of energy using padlocks and other physical means, Tagout refers to the marking of important lockout points with information or warning signs.

124

Kasp 124 series padlocks, with lock body and shackle constructed from solid brass, offer corrosion resistance and anti-spark properties. The coloured vinyl jacket not only protects precious paintwork from accidental damage, but also makes the Kasp 124 series the ideal padlock for electrical lock-off applications when combined with the Kasp 200 series lock-off hasp.
